by Roberto Ferravante	13
by Gennaro Improta	15
by Alan McKinnon	17
by Alfonso Morvillo	19
by Guido Nassimbeni	21
by Edward Sweeney	23
<i>Acknowledgments</i>	25
<i>Summary</i>	29
Chapter one	
<i>Introduction</i>	31
1.1 General background	31
1.2 Features and evolving trends of the Italian 3PL market	34
1.3 Book objectives and research questions	40
1.4 Research approach	40
1.5 Book structure	41
Chapter two	
<i>Innovation and ICT diffusion: General business perspective</i>	45
2.1 Introduction	45
2.2 Innovation definition and classification	46
2.3 Innovation in services	52
2.4 Innovation diffusion in business	55
2.4.1 Review of the main models of diffusion of innovation in business	55
2.4.2 ICT related innovation in business	64
2.4.3 Diffusion of innovation in small business	71
2.4.4 ICT related innovation in small business	79
2.5 Conclusion	86

Chapter three	
<i>Innovation and ICT diffusion: Logistics and Supply Chain perspective</i>	89
3.1 Introduction	89
3.2 Supply chain management and the third-party logistics role	90
3.2.1 SCM evolution and customer requirements	90
3.2.2 Definitions of 3PL in the existing literature	104
3.2.3 The evolving role of 3PLs in the supply chain	108
3.2.4 Strategic challenges for 3PLs	112
3.3 ICT innovation in supply chain management and logistics	117
3.3.1 Evolution and definition of ICT in supply chain management, logistics and 3PL industry	117
3.3.2 ICT in Supply Chain Management	126
3.3.3 ICT in logistics	133
3.3.4 ICT in 3PL industry	135
3.4 ICT innovation in small 3PLs	142
3.5 Conclusion	152
Chapter four	
<i>Methodology</i>	155
4.1 Introduction	155
4.2 Research context	155
4.3 Definition and taxonomy of small 3PLs	157
4.3.1 Structure of the Italian 3PL industry	158
4.3.2 Specific issues associated with innovation and ICT	159
4.3.3 Definition and classification of small 3PLs	160
4.4 Research strategy	162
4.4.1 Quantitative versus qualitative research	163
4.4.2 Pros and cons of multiple research approach	164
4.4.3 Triangulation	165
4.5 Research design	166
4.5.1 Aim	169
4.5.2 Objectives	169
4.5.3 Research questions	170
4.6 Hypothesis development	170
4.7 Contingency model	183
4.8 Research methods	183
4.8.1 Questionnaire survey	185
4.8.2 Focus group discussion	187
4.8.3 Case study	192
4.9 Conclusion	204

Chapter five	
<i>Questionnaire survey</i>	207
5.1 Introduction	207
5.2 The usage of ICT in the Italian logistics service market	207
5.3 Survey design and methodology	209
5.3.1 Definition of basic survey objectives and questionnaire design	209
5.3.2 Focus groups discussion to revise survey objectives and questionnaire	211
5.3.3 Population definition, preparation of mailing list and survey implementation	221
5.3.4 Data analysis	223
5.4 Survey results	226
5.4.1 Introduction	226
5.4.2 Sample characteristics	227
5.4.3 Technological profile	228
5.4.4 The role of ICT tools in supporting the customisation of service	232
5.4.5 Perception of ICT role	234
5.4.6 Factors influencing the level ICT adoption	239
5.4.7 Focus group for evaluating results	241
5.4.8 Assessing the use of ICT by small 3PLs: a contingency approach	243
5.5 Conclusion	268
Chapter six	
<i>Case study analysis</i>	271
6.1 Introduction	271
6.2 Case study description	271
6.2.1 Full Haulage Providers	272
6.2.2 Basic Logistics Providers	279
6.2.3 Advanced Logistics Providers	291
6.3 Analysis	303
6.3.1 Comparison of Full Haulage Providers	303
6.3.2 Comparison of Basic Logistics Providers	307
6.3.3 Comparison of Advanced Logistics Providers	311
6.4 Overall interpretation and conclusion	317
Chapter seven	
<i>Discussion of results</i>	321
7.1 Introduction	321
7.2 Integrated discussion of survey and case findings	322
7.3 Matching empirical evidences with literature review	329
7.3.1 Introduction	329
7.3.2 Innovation in service and SMEs	329

7.3.3	ICT innovation diffusion in SMEs	330
7.3.4	ICT innovation diffusion in SCM, logistics and 3PL industry	332
7.3.5	ICT innovation diffusion in small 3PLs	333
7.4	Managerial implications	339
7.4.1	Implications for small 3PLs	339
7.4.2	Implications for ICT vendors	341
7.5	Framework development	342
7.6	Summary and conclusion	345
Chapter eight		
	<i>General conclusions and implication for further research</i>	347
8.1	Re-statement of the objectives and research questions	347
8.2	Extent to which the research questions have been achieved	347
8.2.1	Research Question 1: What ICT practices are currently used in the provision of value added services by small 3PLs?	348
8.2.2	Research Question 2: What are the major drivers, enablers and inhibitors of ICT usage in small 3PLs?	349
8.2.3	Research Question 3: What is the relationship between ICT implementation and the competitiveness of small 3PLs?	351
8.3	The proposed framework and the research questions	352
8.4	Methodological and analytical contribution	354
8.5	Research limitations	354
8.6	Directions for future research in the field	356
